

## RESEARCH ARTICLE

# Title: Authors' Instructions for the Preparation of JCCST(Formerly MAJ) Journal Format

In the title, the first letter of each word should be in capital letter except for prepositions

### ABSTRACT

A brief informative abstract, should clearly bring out the scope of the work and its salient features.

It should be a single paragraph of not more than 250 words.

Do not use abbreviations in the title or abstract unless they are unavoidable.

Expand all abbreviations at first mention in the text.

**Keywords:** *Keyword; Italics; First letter; Capital; Semicolon*

The abstract should be followed by the important words of the article, which can be included in various indexes. Keywords should immediately follow the abstract. The max.no. Of keywords allowed is 6. First letter of each keyword must be capitalized. Each keyword should be separated by **semicolon**. **Italicise the keywords. First letter should be in capital.**

#### General instructions

1. *(et al)* must be italicized
2. Single space between number and the unit (3 kg)
3. SI unit must be followed (mL)
4. Single space after fullstop.
5. Single space between the number and degree Celsius

## INTRODUCTION

MAJ supports the author to publish both research and review article.

- RESEARCH articles should focus on original investigations and innovative research contributions relevant to the agriculture domain.
- REVIEW articles should focus on in-depth explorations or review on previously conducted research by laboratory or research experts.

It should be brief, crisp and introduce the work in clear terms. During the time of paper submission, the data collected should be less than **3 years**. Proper citations must be provided for the key references of the article. A certificate signed by all authors indicating the originality of research work should be produced during submission of the manuscript.

Article/s submitted to MAJ must not be submitted to any other journals and it should not be in possible consideration for publications with any other publishers. No part of a paper published by MAJ should be reproduced or published elsewhere without a written permission from the publisher. The content of the manuscript must not include information whose disclosure will be prejudicial to the national interest.

The articles submitted to MAJ will be given utmost priority for publication. However, if the article is not relevant to the scope of our journal and if the quality of the paper is not satisfactory, the article submission may be directly rejected. If the article comes under the scope of our journal, then it is sent for review to three reviewers relevant to the article subject. Usually, it takes about one month for the first round of the review report. If the reviewers are satisfactory, then there are more chances for the article to be accepted. Papers are accepted on the basis that the contributions in the article are original and have not been published elsewhere and that the authors have acquired necessary authorization for publication of any secondary data or material submitted.

## **MATERIAL AND METHODS**

The standard and already reported method must be clearly given or cited. Any modification of the original method must be duly highlighted. This section may be subtitled for clarity. Use standard abbreviations of the various units. SI units should be used for measurements.

## **RESULTS AND DISCUSSION**

This section can also be subtitled for clarity. Salient results must be highlighted and discussed with related works. A brief conclusion of the research finding and future line of work may be given at the end.

### **Tables**

Tables should be typed on separate sheets and numbered consecutively within the text in Arabic numbers as in **Table 1**. They should bear a descriptive short heading in lower case, which starts with the word "Table". Their place in the text should be indicated. **Only minimum tables are encouraged ,all possible tables should be converted into coloured graphs with error bar.**

### **Figures and Structures**

Structure drawings, graphs, and diagrams should be given in JPEG preferably through MS Word or MS PowerPoint. Photographs must be on glossy paper or in high-resolution soft copy. Colour printing of the photographs will be charged separately. Figures/structures must be numbered with figure numbers like Figure 1, Figure 2, and must be indicated in the approximate position in the text. It is the author's responsibility to provide suitable figures and drawings. Graphs should be in colour with error bars presented on the top right. Graphs should be clearly labeled.

### **Quality of figure and graphs**

The figure should be clear, definite and blur-free with good contrast as in Fig. 1. All lettering used inside the figure should be visible enough to permit legible reduction. Quality of the figure resolutions must be as follows: 300dpi for color images; 600dpi for mono images; 72dpi for screen images; 600dpi for line drawings.

### **Maps**

Ensure that you are using the authorized maps as the base for map figure drawing. Maps drawn without any authorized base have to submit a certificate from the Surveying and Mapping management as proof of authorization. All the maps should follow the publishing requirements released by the Government.

### **Formulae and equations**

Formulae should be provided in the appropriate places and must be typewritten. It is better to insert the equations as an object by using the Microsoft Equation Editor. All the symbols and letters used in the formulas must be identical, clear and definite. The style of the appearance of the symbols and scripts must be given proper care. **Subscripts and superscripts should be set off clearly.** The Equation number must appear at the end of the equation line. The equation must be abbreviated as Eqn. along with the numbering for referencing in the text (Eqn.1). Equations should be placed in a separate line and must not run along with the text.

For example:

$$A = \pi r^2 \quad (1)$$

### **Abbreviations**

Do not use abbreviations in the title or abstract unless they are unavoidable. Expand all abbreviations at first mention in the text. (*et al*) should be italicised throughout the article.

### **DOI**

The Digital Object Identifier (DOI) number is used to cite and link to the electronic documents. It consists of a unique alpha-numeric character string for initial electronic publication. This number is usually generated and assigned by JCCST for the accepted articles in this publication. This unique number is used for citing or referring a document. The correct format for citing a DOI is as follows (the example is taken from a document in the Journal of Current Crop Science and Technology): doi:10.29321/MAJ.10.000XXX

### **CONCLUSION**

### **Funding and Acknowledgment**

The authors acknowledge the financial support provided to SU by DBT, GoI, through Indo-Russian collaboration (No.DBT/IC2/Indo-Russia/2014-16).

### **Ethics statement**

No specific permits were required for the described field studies because no human or animal subjects were involved in this research.

### **Originality and plagiarism**

Authors should ensure that they have written and submit only entirely original works, and if they have used the work and/or words of others, that this has been appropriately cited. Plagiarism in all its forms constitutes unethical publishing behavior and is unacceptable.

### **Consent for publication**

All the authors agreed to publish the content.

### **Competing interests**

There were no conflict of interest in the publication of this content

### **Data availability**

All the data of this manuscript are included in the MS. No separate external data source is required. If anything is required from the MS, certainly, this will be extended by communicating with the corresponding author through corresponding official mail; [usiva@tnau.ac.in](mailto:usiva@tnau.ac.in).

### **Author contributions**

Research grant-US, Idea conceptualization-US, Experiments- GM, MVR, ST ,Guidance -US, ST,IM, Writing original draft - GM, MVR, IM, ST, Writing- reviewing & editing -US, IM , ST

## REFERENCES

Relevant references shall be quoted under each section and must be cited in full in the reference section. **References to unpublished work and the abstract citation may be avoided.**

The following style should be adopted. References need not be numbered but should be **arranged alphabetically** in chronological order. Carefully follow the punctuation style. Journal name should be **abbreviated and italicised**. **Volume number** in **BOLD** followed by **page number**.

### JCCST REFERENCE STYLE

1. Kindly follow the punctuation style.
2. Author name should be separated by **.**, Last author initial should be in continuous with (and)
3. Year should not be in brackets. Article title should not be in double quote.  
Year should be placed at the end of last author name.
4. Journal title-abbreviation only – italicised followed by (.,)
5. Journal issue-**BOLD**- followed by colon.
